Digital Transformation : Goals, and approaches within the FDFA

SDC Zollikofen, 13. December 2023

TRANSFORMATION JOURNEY

We have a common understanding and know where we want to go. We show the way forward transparently and implement this in small, motivating, concrete and realistic steps.

DATA / INFORMATION

We use data and information jointly, intelligently and generate added value from it.

Decisions and communication can be made quickly, comprehensibly and reliably. Steering is based on actual and accurate data.

WHY DIGITAL TRANSFORMATION

At the SDC we ensure that the digital transformation, with its technological innovation and cultural change, will help us to fulfil our purpose, to implement Switzerland's International Cooperation Strategy and to support the achievement of the Sustainable Development Goals.
We will engage in the transformation to work smartly, effectively and efficiently, using a flexible, transparent and data-driven approach that focuses on people first.

DIGITAL COMPETENCE

We ensure employees at all hierarchical levels have the necessary digital competence and use it in an effective manner.

COLLABORATION

We create an environment where we can work together digitally, innovatively and consistently. Repetitive processes are questioned, designed with the future in mind and, if possible, automated.

CULTURE / LEADERSHIP

We encourage the development of a working culture where employees can make and implement courageous decisions and be creative.

We have leaders who empower, enable, accompany and support the employees.

TECHNOLOGY

We build an IT infrastructure that meets the needs of functionality, ergonomics and security and provides users with access to data and digital services.
Anytime – Anywhere.

INSTITUTIONAL ENVIRONMENT

We value the SDC's unique characteristics and embrace change. The diversity and motivation of SDC employees is a great asset and we take care of it.

SDC Charta

At the SDC we ensure that the digital transformation, with its technological innovation and cultural change, will help us to fulfil our purpose, to implement Switzerland's International Cooperation Strategy and to support the achievement of the Sustainable Development Goals.

We will engage in the transformation to work smartly, effectively and efficiently, using a flexible, transparent and data-driven approach that focuses on people first.
