

Aggregated Reference Indicator (ARIs)	
CCE_ARI_3 Policies and legal frameworks on climate change, DRR and environment	
Number of climate change, DRR and environmental policies / legal frames supported.	
Contribution to objective of M25-28	<i>Objective: Climate and environment: Guarantee development that respects the climate and nature, is resilient to climate change and natural disasters, and improves the living conditions of the most vulnerable populations.</i>
Contribution to 2030 Agenda: SDG target	<p>SDG targets:</p> <p>13.2: Integrate climate change measures into national policies, strategies and planning.</p> <p>15.9: Integrate ecosystem and biodiversity values into national and local planning, development processes, poverty reduction strategies and accounts</p> <p>11.b: Substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015–2030, holistic disaster risk management at all levels</p>
Definition (description, specification, qualification)	<p>Policies and legal frameworks: refer to policies, regulations, laws, strategies, plans, governmental budgets, norms and programmes at sub-national, national and international level, co-influenced by the SDC and partners, which empower and impact positively on the target population in terms of climate change, DRR, and/or the environment.</p> <p>Support: includes the elaboration, enforcement and/or implementation of the policy/legal frameworks (including also individual and/or institutional capacity building which directly related to the elaboration, enforcement and implementation of these frameworks)</p> <p>Note:</p> <p>Please check whether the policy markers disaster risk reduction (PM DRR), climate change mitigation (PM CC Mitigation) and/or climate change adaptation (PM CC Adaptation) should be set to principal or significant for the project for which this indicator is used.</p>
Measuring unit	Number of policies/frames
Disaggregation dimension (sex, age group, ethnicity or other identity criteria of LNOB)	<p>a) climate change policies / legal frames</p> <p>b) DRR policies / legal frames</p> <p>c) environmental policies / legal frames</p> <p>For the calculation, the following formula will be applied by the RDM system: (a + b + c)</p>
Data source	Official country reporting / measurement at country level and project reporting
Rationale	<p><u>Theory of Change:</u></p> <p>If climate change, DRR and environmental aspects are incorporated into key policy/legal documents,</p>

	<p>then this leads to more concrete action on the ground to contain the negative impacts of climate change, natural hazards and environmental degradation on human development,</p> <p>because strengthened institutional and legal frameworks form a necessary (but not sufficient) condition for this to happen.</p>
Possible messages of aggregation, synthesis and contribution	Thanks to the support of the SDC, in 202x / between 202x and 202x, xx policies / legal frames on climate change, DRR and/or environment were elaborated / enforced / implemented at sub-national / national / international level.
Thematic responsibility	Focal Point section CDE
